Pin Length 12 mm

Description

The Akyga® AK-ND-C05 adapter enables you to replace a standard USB-C connector with a 3.5x1.3 mm plug. USB type C is one of the most widely used standard in electronic equipment. This modern solution is used on many areas, but often, we have older equipment with a different power socket. This is when a charging adapter proves indispensable. Thanks to it, we can easily connect the universal USB-C PD charger to our laptop. What is more, the adapter is compatible with the **Power Delivery standard**, which means that your device is completely safe. This is all thanks to the automatic selection of current and voltage levels to suit the requirements of your laptop. Thanks to this, the output of the adapter's tip will be between 18.5 and 20 V.

It is worth remembering that the USB-C adapter does not increase the power of the charger it is used with. Therefore, before using it, make sure that the power adapter has enough power to power our device.
