Settings

①Long press the "M" button to enter the video menu of video standby mode:

(P7: video menu)

2) Then press the "M"button to get into the set up menu:

(P8: set up menu)

Save Settings

If you need to save the settings, long press the power button (P4/1) to turn off the device after you set everything right. Disrupting the power source directly will result in the loss of any unsaved settings.

Safety and Maintenance

- 1. Please keep the device in a clean and dry environment, away from oil, water, gas and other materials that may cause corrosion. The product contains tiny parts and is not edible, please operate under the guidance of guardians or teachers to avoid accidental ingestion.
- 2. When the image quality is poor, clean the lens with a dry, soft cloth.
- 3. Do not press hard or hit the display with sharp objects. To clean dust from the screen surface or case, wipe with a dry and soft cloth. Never spray water or cleaners directly on the display.

FAQ

1. Why is the device unable to turn on properly?

Please check the circuit and power supply according to the installation instructions (5V 2A power adapter is recommended).

2. Why can't I obtain a clear image?

Please adjust the LED light, object distance, and refocus. If you still can't get a clear image, please wipe the lens gently with a clean cotton cloth etc.

3. Why are the settings unable to be saved?

After all settings are completed, long press the power button to shut down the device. The settings will not be saved if the power is turned off by the power cable or if the power is cut off directly.

4. Why is there a message of crash, memory card error or memory card full after inserting the TF card?

After inserting the TF card, please format it first. It is recommended to use a high-quality TF card with class 10 and above specifications.
