Description

The **Akyga® AK-MB-12 TV mount** is the ideal solution for those looking for a minimalist screen mounting bracket. Thanks to its ultra-thin design, the TV or screen can be mounted extremely close to the wall, making it the perfect choice for rooms where every centimetre counts. The minimal distance from the wall not only optimises the aesthetics of the interior, but also allows the screen to be mounted discreetly in areas with limited space.

VESA Compatibility

The AK-MB-12 **TV bracket** offers great adaptability to different screen sizes. The mount supports **VESA standards: 100x100, 200x200, 300x300, 400x200, 400x600, 400x800 and 800x600 mm**. This makes the TV mount suitable for most screens available on the market within the designated size range.

A Mount for Small Spaces

The AK-MB-12 **wall TV mount** is the ideal choice for rooms where space-saving is crucial. Its **short distance from the wall** ensures that the screen does not stand out, which emphasises the elegant and neat appearance of the whole without affecting functionality or safety. The bracket's design does not allow the screen to rotate or tilt, making it the perfect solution for those who prefer a fixed display position without the need for additional adjustment.

Minimalist Design and Solid Mounting

The TV wall mount has been designed for maximum durability, making it the ideal choice **for mounting screens weighing up to 60 kg**. Its stable design minimises the risk of damage to your equipment, ensuring long-lasting and trouble-free use.
