

## USB Autofocus Camera Module

### - 8MP Sony IMX179

SKU: B0197

## 1. Introduction

### ■ About Arducam

Arducam is a professional designer and manufacturer of SPI, MIPI, DVP and USB cameras since 2012. We also offer customized turnkey design and manufacturing solution services for customers who want their products to be unique.

### ■ About this USB Camera

The B0197 is a new member of the Arducam's USB camera family. It's an 8MP, UVC compliant, autofocus (AF) USB 2.0 camera. This AF USB camera is based on the 1/3.2" Sony IMX179 image sensor, and you can read more about its specs in the next chapter. Arducam also provides the sample application that demonstrates some of the features of this camera.

### ■ About UVC

The B0197 is a UVC-compliant camera. The native UVC drivers of Windows, Linux and Mac shall be compatible with this camera so that it does not require extra drivers to be installed.

### ■ About Customer Service

If you need our help or want to customize other models of USB cameras, feel free to contact us at [support@arducam.com](mailto:support@arducam.com)

Cable Length: 3.3ft (1M)

## 3. Quick start

### ■ How to download the program

Download the APP Amcap from the following link <https://www.uctronics.com/az/AMCap.exe>

NOTE: If used with the Andriod device, USB Camera APP and connect adapter are needed.

### ■ How to connect the camera

Connect the one end of the USB 2.0 cable to the USB 2.0 connector provided on the back of B0197, and connect the other end to the USB 2.0 host controller on the computer.

## 4. How to use the program (Windows demo only)

The Menu bar at the top of the shown image contains few menu items and the current preview resolution and the frame rate are displayed on the bottom bar when the application is running.

The following sections describe each of the menu items in detail.

■ Menu>Devices

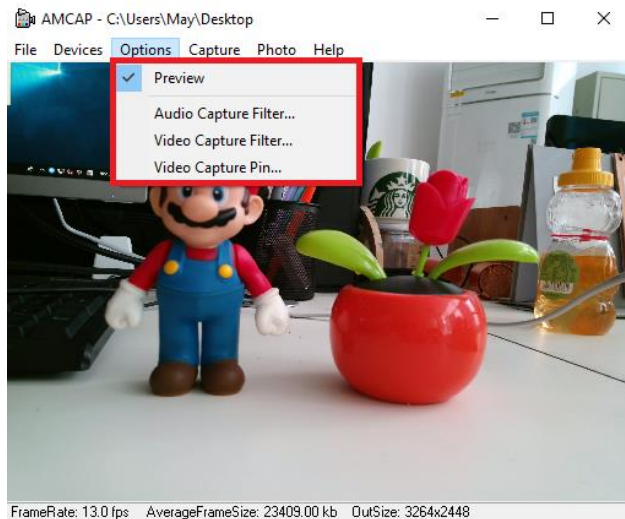

This menu will show the available video devices to host PC. The B0197 named "RecordexUSA".

This camera support capturing audio, so the menu shows the "Recordex Audio".

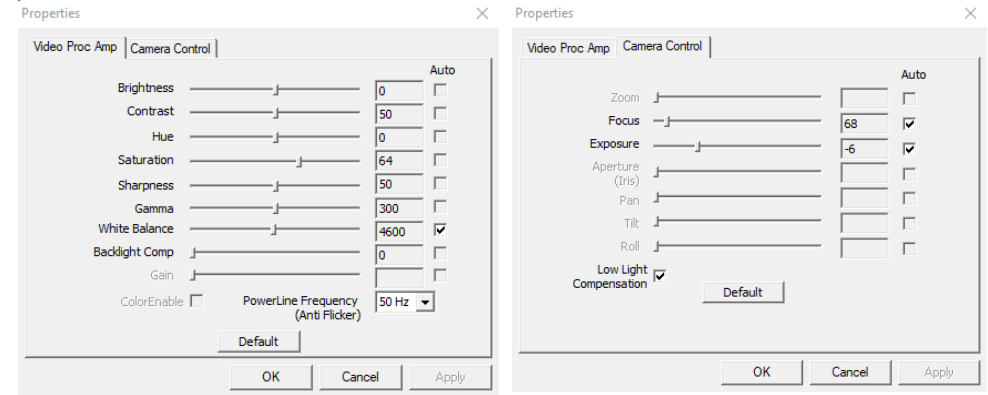

■ Menu> Options

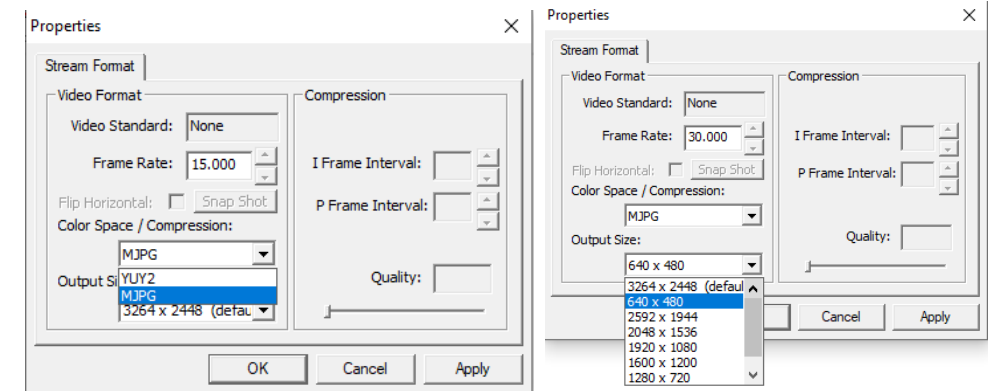

The options menu can be used to select the preview and audio and image parameters supported by this camera.

- Video Capture Filter -> Video Proc Amp/Camera Control

- Video Capture Pin

■ Menu> Capture

The capture menu is used to capture the still image and video by using this application. You can also select the related parameters.

NOTE: If you want to get the voice from the microphone, you need to select the option "Capture Audio" before capturing video.
