

Getting started with the X-NUCLEO-S2868A2 Sub-1 GHz 868 MHz RF expansion board based on S2-LP radio for STM32 Nucleo

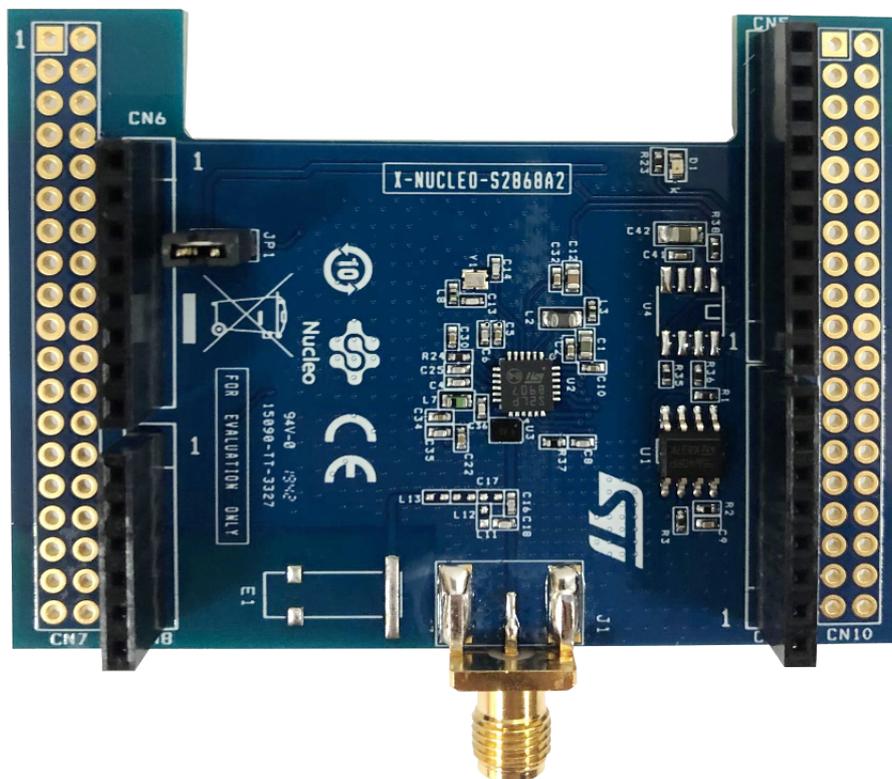

Introduction

The X-NUCLEO-S2868A2 expansion board is based on the S2-LP ultra-low power RF transceiver and operates in the 868 MHz ISM frequency band.

The X-NUCLEO-S2868A2 interfaces with the STM32 Nucleo microcontroller via SPI connections and GPIO pins. You can change some of the GPIOs by mounting or removing the resistors.

The expansion board is compatible with ST morpho and Arduino UNO R3 connectors.

Figure 1. X-NUCLEO-S2868A2 expansion board

1 Acronyms and abbreviations

Table 1. List of acronyms

Acronym	Description
AMR	Automatic meter reading
EEPROM	Electrically erasable programmable read only memory
GHz	Giga Hertz
GUI	Graphical user interface
LED	Light emitting diode
MCU	Microcontroller unit
P2P	Point-to-point communication
RF	Radio frequency communication
SPI	Serial peripheral interface
USB	Universal serial bus
wM-Bus	Wireless metering bus
WSN	Wireless sensors network

2 Getting started

2.1 Overview

The [X-NUCLEO-S2868A2](#) main features are:

- Based on [S2-LP](#) radio
- S2-LP narrow band ultra-low power sub-1 GHz transceiver tuned for 860 - 940 MHz frequency band
- Programmable RF output power up to +16 dBm
- Modulation schemes: 2-FSK, 2-GFSK, 4-FSK, 4-GFSK, OOK and ASK
- Air data rate from 0.1 to 500 kbps
- Ultra-low power consumption: 7 mA RX and 10 mA TX at +10 dBm
- IEEE 802.15.4g hardware packet support with whitening, FEC, CRC and dual SYNC word detection
- RX and TX 128 byte FIFO buffers
- Support to wireless M-Bus
- Excellent performance of receiver sensitivity (up to -130 dBm)
- Automatic acknowledgement, retransmission and timeout protocol engine
- Compatible with [STM32 Nucleo](#) boards
- Compatible with Arduino UNO R3 connectors
- [BALF-SPI2-01D3](#) IPD balun for matching network and harmonics filter
- Sigfox compatible
- Sample firmware for P2P communication
- 6LoWPAN compatible thanks to [STM32Cube](#)
- RoHS and WEEE compliant

The [X-NUCLEO-S2868A2](#) expansion board can be used for the evaluation of the [S2-LP](#) device in multiple applications:

- wM-Bus applications
- Point-to-point communication protocol
- 6LoWPAN applications
- SigFox communication

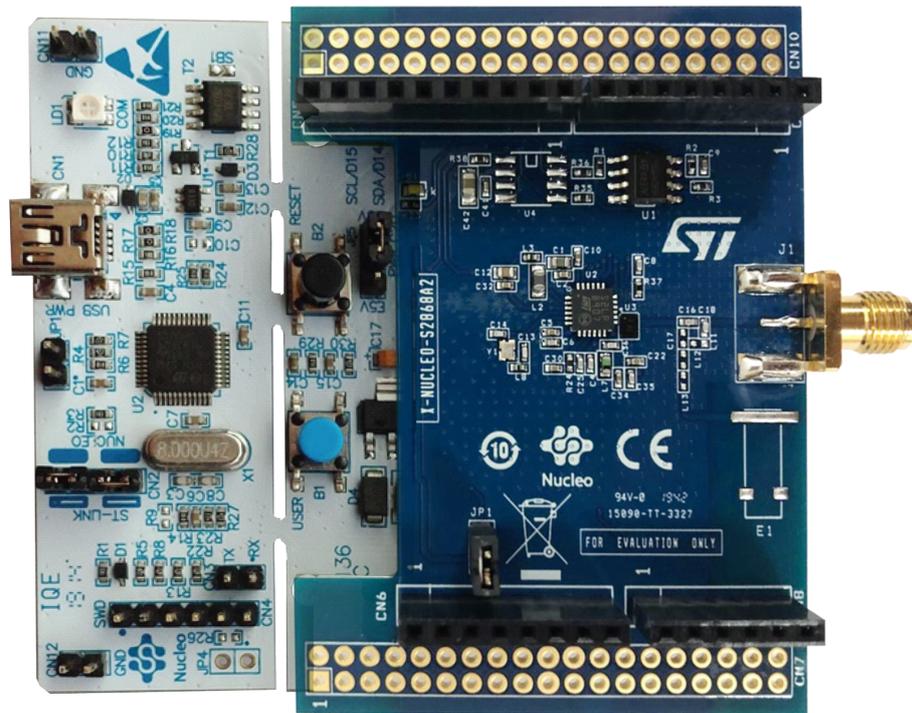

You can develop other applications for evaluating the devices, such as:

- SigFox communication
- Automatic meter reading
- Home and building automation
- WSN
- Industrial monitoring and control
- Wireless fire and security alarm systems

2.2 Hardware and software requirements

To use the [X-NUCLEO-S2868A2](#) expansion board with [STM32 Nucleo](#) development boards, connect the boards as shown below.

Figure 2. X-NUCLEO-S2868A2 expansion board connected to an STM32 Nucleo development board

The interconnection between the [STM32 Nucleo](#) and the [X-NUCLEO-S2868A2](#) is designed to allow the use of any [STM32 Nucleo](#) board, although complete testing has only been performed on the [NUCLEO-L053R8](#), [NUCLEO-F401RE](#) and [NUCLEO-L152RE](#) boards hosting ultra-low power STM32 microcontrollers.

The minimum hardware and software requirements are listed below:

- a PC/laptop with Microsoft Windows (7 and above) to install the software package ([X-CUBE-SUBG1](#))
- a type A USB to mini-B USB cable to connect the STM32 Nucleo board to the PC/laptop
- 128 MB of RAM
- Approximately 40 MB of hard disk space for the firmware
- Approximately 15 MB of hard disk space for the wM-Bus GUI

The use of the wM-Bus concentrator with the GUI requires additional boards to be connected to the PC. The GUI can be used to check the wM-Bus communication protocol.

2.3 Board setup

- Step 1.** Check that the jumper on JP1 connector is connected to provide the required voltage to the board devices.
- Step 2.** Connect the [X-NUCLEO-S2868A2](#) to the [STM32 Nucleo](#) board as shown in [Figure 2](#).
- Step 3.** Power the STM32 Nucleo development board using the Mini-B USB cable.
- Step 4.** Program the firmware in the STM32 on the STM32 Nucleo development board using the firmware sample provided.
- Step 5.** Preset the reset button on the STM32 Nucleo development board.
The evaluation kit is ready-to-use.

3 Hardware description and configuration

3.1 Interconnection details

The [X-NUCLEO-S2868A2](#) expansion board and the [NUCLEO-F401RE](#) or [NUCLEO-L152RE](#) board connection details are listed in the table below.

Table 2. X-NUCLEO-S2868A2 and NUCLEO-L152RE connection details (left connector)

Signal name													
NC	IOREF	RESET	3V3	5V	GND	GND	VIN	A0	A1	A2	A3	A4	A5
Connector name													
CN6 Power							CN8 Analog						
Pin number													
1	2	3	4	5	6	7	8	1	2	3	4	5	6
NUCLEO-L152RE MCU port													
								PA0	PA1	PA4	PB0	PC1	PC0
X-NUCLEO-S2868A2 expansion board signals													
			3V3		GND	GND		GPIO0	CSN	GPIO1	GPIO2	GPIO0 ⁽¹⁾	GPIO3

1. Used to enable different configurations in case a signal conflict occurs when using other expansion board (refer to next section).

Table 3. X-NUCLEO-S2868A2 and NUCLEO-L152RE connection details (right connector)

Signal name																	
D15	D14	AREF	GND	D13	D12	D11	D10	D9	D8	D7	D6	D5	D4	D3	D2	D1	D0
Connector name																	
CN5 Digital									CN9 Digital								
Pin number																	
10	9	8	7	6	5	4	3	2	1	8	7	6	5	4	3	2	1
NUCLEO-L152RE MCU port																	
PB8	PB9			PA5	PA6	PA7	PB6	PC7	PA9	PA8	PB10	PB4	PB5	PB3	PA10	PA2	PA3
X-NUCLEO-S2868A2 expansion board signals																	
			GND	SPI_CLK ⁽¹⁾	SPI_MISO	SPI_MOSI	SPI_CS ⁽¹⁾		nS ⁽¹⁾	SDN	SDN ⁽¹⁾	nS		SPI_CLK			

1. Optional connection

3.2 SPI and GPIO connection options

The SPI and GPIO connection options between the [STM32 Nucleo](#) and [S2-LP](#) can be used to enable different configurations in case a signal conflict occurs when using other expansion boards.

Table 4. S2-LP interface (optional) with STM32 Nucleo board

S2-LP signal	Default STM32 port	Optional STM32 port
GPIO0	PA0	PC1 To use the optional connection, mount R18, unmount R12
CSn	PA1	PB6 To use the optional connection, mount R9, unmount R13
CLK	PB3	PA5 To use the optional connection, mount R6, unmount R11
nS	PB4	PA9 To use the optional connection, mount R7, unmount R22
SDN	PA8	PB10 To use the optional connection, mount R19, unmount R10

To use the optional connections, modify the firmware on the basis of the STM32 resources used.

3.3 Current measurement

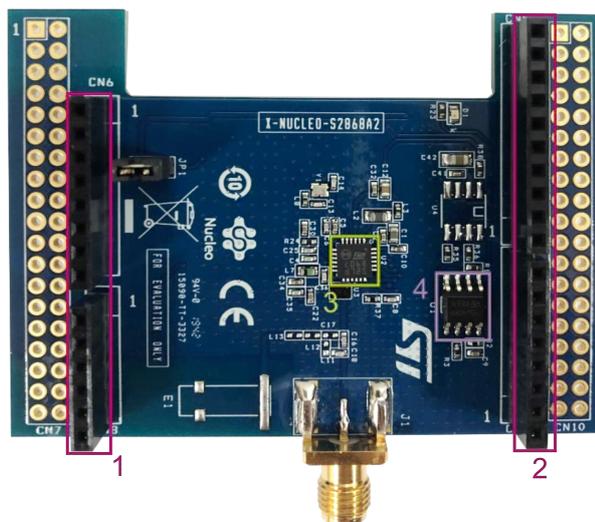

To monitor the [X-NUCLEO-S2868A2](#) expansion board power consumption, use jumper JP1: connect an ammeter probe between the connector pins 1 and 2 for measurements.

3.4 X-NUCLEO-S2868A2 component placement details

The figure below shows the component placement on the [X-NUCLEO-S2868A2](#) expansion board.

Figure 3. X-NUCLEO-S2868A2 on-board device placement

4 X-NUCLEO-S2868A2 on-board device description

4.1 SPI EEPROM

The [M95640-R](#) is a 64 Kbit serial SPI bus EEPROM with high-speed clock interface. The device can be used to store the configuration parameters related to [S2-LP](#) RF device application or settings.

Features	Description
Order code	M95640-RMC6TG
Package	MLP8
Operating voltage	1.8 to 5.5 V

4.2 S2-LP RF transceiver

The [X-NUCLEO-S2868A2](#) expansion board is based on the [S2-LP](#) standalone RF transceiver. It operates in the 868 MHz ISM frequency band and wireless M-Bus.

The [S2-LP](#) narrow band ultra-low power sub-1 GHz transceiver is tuned for 430-470 MHz and 860 - 940 MHz frequency bands and programmable RF output power up to +16 dBm.

Table 5. S2-LP details

Features	Description
Order code	S2-LPQTR
Package	QFN24 4x4x1
Operating voltage	1.8 to 3.6 V

7 Formal notices required by the U.S. Federal Communications Commission ("FCC")

FCC NOTICE: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

Additional warnings for FCC

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference's by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

8 Formal product notice required by the Industry Canada ("IC")

Innovation, Science and Economic Development Canada Compliance - This device complies with Innovation, Science and Economic Development RSS standards. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

Conformité à Innovation, Sciences et Développement Économique Canada - Cet appareil est conforme aux normes RSS d'Innovation, Science et Développement économique. L'utilisation est soumise aux deux conditions suivantes: (1) cet appareil ne doit pas causer d'interférences nuisibles, et (2) cet appareil doit accepter de recevoir tous les types d'interférence, y comprises les interférences susceptibles d'entraîner un fonctionnement indésirable. Les changements ou les modifications non expressément approuvés par le fabricant pourraient annuler le permis d'utiliser l'équipement.
